

Operational Support

NCAB Group is one of the largest PCB producers globally and our vision is to be #1 wherever we are in the world. This is achieved through our ability to support our customers with the best possible time to market and competitive advantage through producing PCB's with lowest total cost and best in class performance.

NCAB Group is proud to have a strong set of corporate values and an established commitment to corporate and social responsibility (verified according to ISO 26000) that guides our daily work.

Since starting in 1993 we have seen constant global expansion where today we have 19 offices based in 13 countries and selling into 45 markets across the globe.

With this global presence, 2015 saw NCAB Group supply 90 million PCB's with a revenue of approximately €130 M.

In order to support continued growth, NCAB Group is recruiting to fulfill a new Operational Support role within the Operations team. The candidate will be based in the NCAB Group France office yet undertaking international travel as necessary and reporting directly to the Chief Operations Officer.

Main Responsibilities will include, but not limited to:

- Develop strong relationships with all key factories and factory management team.
- Work with NCAB Group factory management team and associated factories to coordinate and deliver continuous improvement projects based upon measureable goals and activities.
- Monitoring and reporting of progress for improvement projects through data analysis and on site review meetings.
- Support on factory or project development plans as initiated by the Group Function.
- Play a key role in activities specifically aimed towards developing/strengthening the European supply chain model.
- Supporting business reviews with key factories in China and Europe.
- Support in collating and analysis of market / economic data and also the publishing of market watch reports.
- Exercising independent and informed judgment in factory / supply chain related decisions.
- Support on factory administration activities.

Job Requirements / Experience:

- Excellent written and spoken English (the main language used within the role is English).
- Ability to travel internationally.

- Strong, proven communication and interpersonal skills, and a natural ability to work professionally with both suppliers and customers.
- 4+ years of experience and knowledge of the printed circuit board (preferred) or printed circuit board assembly industry.
- 3+ years of supply chain / operational experience, preferably working with overseas supply chains.
- Excellent analytical, planning and organizational skills.
- Education to a minimum BAC plus 2, up to a masters level.

Package:

- Salary - negotiable. Competitive based upon experience.
- CDI contract, plus RTT.
- Laptop and mobile phone.
- 5 weeks holiday entitlement.
